-- Package of CI -- Deployed in the Azure VM or Server or Web App

Artifact/ Package – Integrated or Compiled set of code

The screenshot shows the Azure DevOps portal interface. The left sidebar contains a navigation menu with options: Overview, Boards, Repos (selected), Files, Commits, Pushes, Branches, Tags, Pull requests, Advanced Security, Pipelines, Test Plans, and Artifacts. The main content area is titled 'Files' and shows a table of files in the 'master' branch of the 'AmazonWeb' repository. The table has columns for Name, Last change, and Commits.

Name	Last change	Commits
Amazonweb	24 Oct 2025	9f94b2f0 Updated HomeController.cs Abdullah Kh...
.gitignore	7 Nov 2020	bc284760 .gitignore Abdullah Khan
azure-pipelines-1.yml	11 Jun 2025	7 Nov 2020 at 13:32 GMT+5:30 with Azure Pipelines Abdullah K...
azure-pipelines-2.yml	21 Jul 2025	f906e9cf Set up CI with Azure Pipelines Abdullah K...
azure-pipelines.yml	14 Nov 2020	ffa36795 Set up CI with Azure Pipelines Abdullah K...

Repo is the complete git setup within devops portal

Nugget in .Net is similar to pip in python – used to install libraries

The screenshot shows the Azure DevOps interface for the 'AmazonWeb' project. The left sidebar contains navigation links: Overview, Boards, Work items, Boards, Backlogs, Sprints, Queries (selected), Delivery Plans, Analytics views, Repos, Pipelines, Test Plans, Artifacts, and Project settings. The main area is titled 'Queries > My Queries' and includes a 'Run query' button, '+ New', and 'Save'. Below this, there are tabs for 'Results', 'Editor', and 'Charts'. The 'Query type' is set to 'Flat list of work items'. A filter section titled 'Filters for top level work items' contains three clauses: 'Assigned To' is 'Abdullah Khan', 'Work Item Type' is '[Any]', and 'State' is '[Any]'. Below the filters is a table of work items:

ID	Work Item Type	Title	Assigned To	State	Tags
103	Epic	Customer Service Tab	Abdullah Khan	New	
107	User Story	1.Active Orders	Abdullah Khan	Closed	
108	User Story	2.Previous Orders	Abdullah Khan	Active	
109	Task	1.1. Create the UI for Active Orders	Abdullah Khan	New	
110	Task	1.2. Create the API Layer for the Active Orders	Abdullah Khan	New	
111	Task	1.3. Create the DB For the Active Orders	Abdullah Khan	Active	
350	Epic	Amazon Payment	Abdullah Khan	New	
351	Feature	CC Payment	Abdullah Khan	New	

At the bottom, there is a user profile for 'Abdullah Khan (Unverified)'.

Tasks are assigned in boards and are checked regularly

The screenshot shows the Azure DevOps interface for the 'AmazonWeb' project, specifically the 'Pipelines / Releases' section. The left sidebar contains navigation links: Overview, Boards, Repos, Pipelines (selected), Environments, Releases, Library, Task groups, Deployment groups, Test Plans, and Artifacts. The main area is titled 'All pipelines > New release pipeline (1)'. It shows a pipeline configuration with 'Artifacts' (AmazonWeb (1)) and 'Stages' (Stage 3). The 'Stage 3' properties are shown on the right, including 'Stage name' (Stage 3) and 'Stage owner' (Abdullah Khan).

Pipelines – CI

Releases - CD

Automatically every program we code and deploy goes through all phases of CI and then CD of all related tasks begins to run...

Any failures in CD would be notified to everyone in the project, depriving our identity.
